YARIN SOLOMON

Software Developer
+972547218330 • yarinso39@gmail.com • Portfolio • LinkedIn • GitHub

SUMMARY

Co-founder and lead developer of a fitness gaming startup (Mesayaatech Accelerator). CS graduate from **Ben-Gurion University** (GPA: 85) with experience in **full stack development** and **agentic development**. Skilled in building **scalable systems** and **APIs**, with a strong foundation in **algorithms** and **system design**.

EXPERIENCE

Co-Founder & Lead Developer - Get Sweaty Games (May 2026-Present) Google Play

Mesayaatech Accelerator · Reign & Gain: fitness RPG powered by real workouts. Live on Android; iOS in review.

- **Tech:** TypeScript, Node.js, Fastify, Supabase (PostgreSQL), Kotlin, Unity 6, Health Connect, Apple HealthKit, Strava API, Firebase, Render, GitHub Actions
- Built the full backend as sole developer: Fastify REST API (33 endpoints), PostgreSQL (40 tables), CI-deployed migrations, Vitest/Testcontainers tests, daily game-state cron.
- Designed an anti-cheat engine scoring workout trust from 9 pluggable signals (heart rate, GPS, geofencing, manual entry) with per-source weights, gating all rewards.
- Built native Android (Kotlin) and iOS host layers embedding the Unity client, integrating Health Connect, Apple HealthKit, Strava OAuth, and push notifications behind a shared bridge.
- Cut ~163 ms per authenticated request by replacing auth network calls with local JWT verification.

PROJECTS

Automated Job Search Pipeline: WhatsApp → Claude → Telegram (2026) GitHub • Semi-Live Demo

- **Tech:** Anthropic Claude API, LangGraph, Python, FastAPI, SQLite, ChromaDB, Node.js, Telethon
- Engineered a LangGraph pipeline auto-switching to single-call inference at 70% job-post rate.
- Built direct Anthropic SDK integration with Pydantic structured outputs and burst-aware caching.
- Integrated WhatsApp, Telegram, and web scrapers with retry queue and ChromaDB semantic search.

Tunecraft: Multi-Platform Playlist Engineering App (2026) GitHub • App

- **Tech:** React, TypeScript, Tailwind CSS, Node.js, Express, PostgreSQL, Prisma ORM, OAuth 2.0, JWT
- Built a full-stack app integrating Spotify, SoundCloud, and Tidal with REST APIs, PostgreSQL caching, and custom playlist algorithms.
- Implemented multi-platform OAuth 2.0 auth flow with secure token storage and automatic refresh.

AI-driven Backgammon Game (2025) GitHub • Demo

- **Tech:** Python, PyTorch, NumPy, OOP, Neural Networks, MCTS, Minimax
- Built Human-vs-AI and AI-vs-AI modes with a neural network trained on self-play, combined with heuristic evaluation, Minimax, and Monte Carlo Tree Search.

SKILLS

Programming Languages: Python, TypeScript, JavaScript, Kotlin, C#, Java, C, C++
Web / Full-Stack: React, Node.js, Express, Tailwind CSS, Fastify, REST APIs, OAuth 2.0, JWT, FastAPI
Databases: PostgreSQL, Supabase, MySQL, Prisma ORM, SQL, NoSQL, SQLite, ChromaDB
DevOps: AWS, Terraform (IaC), Docker, Kubernetes, Git, GitHub Actions, CI/CD, Render, Linux
Mobile & Game Dev: Unity (C#), Android (Kotlin), iOS, Health Connect, Apple HealthKit, Firebase (FCM)
Machine Learning & AI: PyTorch, LangChain, LangGraph, Claude Code, Cursor
Languages: English (Fluent), Hebrew (Native)

EDUCATION

DevSecOps Course , Analiza (2026)
AWS, Terraform (IaC), Docker, Kubernetes, CI/CD, Linux Servers & VMs, Networks (Cisco Certified)

BSc Computer Science, Ben-Gurion University (2022–2025) • GPA: 85
Selected Courses: Data Structures, Algorithms, Operating Systems, Database Systems, Numerical Analysis

MILITARY SERVICE

Platoon Sergeant, IDF Combat Engineering Corps (2017–2020)
